

# CERTIFICATION COURSE HEAT WORK

Mtk Skolen AS is a course- and training center. The activities are based on a combination of theoretical knowledge and practical exercises. The course center offers courses, exercises, and other activities that are related to security and safety for your company's employees and managers. We offer courses in a realistic and safe environment with professional instructors.

## HEAT WORK

All too often fire might occur when performing heat work. This is largely due to the fact that workers do not take the rightful precautions to avoid fire. The result is great financial strain for both the businesses and the community. From 1.1.2001, it was therefore introduced requirements for approved training and certification for all performing heat work outside organized work space.

## REGULATORY REQUIREMENTS

The demand for training and certification is warranted in the working environment act, fire- and explosion protection law, insurance law, regulations on preventive measures and supervision as well regulations for internal control.

## TARGET GROUP

All who works with heat work outside of a steady, organized work space.

## GOAL

Mtk skolen Mtk skolen want to create safety through realistic and qualitatively training for those who performing heat work, in order to reduce the risk of adverse events.
